

TOPAZ 65" INTERACTIVE PRESENTATION BOARD USER MANUAL

Manual Version 1.1

SAFETY INSTRUCTIONS

- Please keep the display away from any heat sources such as electric radiators or direct sunlight. Place the display in a stable and well-ventilated place.
- Please handle with care so as to not damage the LCD panel.
- The holes or openings on the display are designed for ventilation – do not cover or block the ventilation holes or openings with any objects.
- Remove protective covering from the screen before you use the display.
- As the display surface is vulnerable to scratches, avoid touching the surface with sharp items.
- Shut off the power supply before cleaning. Use a soft lint-free cloth instead of a tissue to wipe the screen.
- You may use a glass cleaner to clean the product as required. However, never spray the cleaner directly onto the display surface.
- Do not attempt to repair this product yourself! Improper disassembly of the product may invalidate the warranty and lead to possible danger!

QUICK START GUIDE

(CONNECTING TO AN EXTERNAL PC/MEDIA PLAYER)

Although the screen has a built in Android operating system and accompanying software, you can also connect it to an external source. The touch screen must be connected to the PC in two ways: visually and interactively. The recommended visual connection is via a HDMI Cable (included) meaning that the display acts like a monitor for the PC. The touch function is achieved by linking the touch panel on the screen directly to the PC via the USB Cable (included).

Figure 1 Screen to PC Connections

Connect the screen to the PC via a HDMI cable and USB cable using the screen’s front ports (as shown above). Once these connections have been made and then PC powered ON, take the power lead and insert it into the screen and connect to a mains outlet. The unit should power ON automatically, if it doesn’t please turn the power switch (next to the power input) to the ON position. If the video signal of the PC does not display then please ensure that the screen is sourcing its display from the PC. Begin by accessing the Control Panel: swipe your finger up from the bottom of the screen to the middle of the screen:

From here you can preview a different input source, such as VGA, then once selected you can touch the “Signal source” panel on the left hand side, or the preview window, to switch the touch screen to this input.

1. INTRODUCTION

Congratulations on your purchase of the TOPAZ 65" Interactive Presentation Board. Please read carefully and follow all instructions in the manual before first use.

The product should not be exposed to liquids dripping or splashing and no objects filled with liquids, such as vases, should be placed on the product.

For user convenience, a number of operations can be performed through the remote control.

Attention:

1. Do not change any default setting when it is unnecessary.
2. Keep the product far away from water during installation and use.

1.1 BOX CONTENTS

- 1 x TOPAZ 65" Interactive Presentation Board
- 1 x Power Cable
- 2 x Wi-Fi Aerial
- 1 x Remote Control (with separate AAA batteries)
- 1 x USB A Male to USB A Male Cable
- 1 x USB A Male to USB B Male Cable
- 1 x HDMI Cable
- 2 x Smart Pen
- 2 x Magnetic Whiteboard Pen
- 1 x Extendable Pointer
- 2 x USB Screen Projection Dongle

IMPORTANT: Please retain your screen's packaging for the duration of your warranty.

1.3 REMOTE CONTROL

2. MENU OPERATION

Begin by accessing the Control Panel: swipe your finger up from the bottom of the screen to the middle of the screen:

From here you can preview a different input source, such as VGA, then once selected you can touch the "Signal source" panel on the left hand side, or the preview window, to switch the touch screen to this input.

When on any other input, excluding the "MeetingPad" input, you can select the "Menu" option to change the hardware configuration such as the picture, sound and power settings.

Source

Here you can select which input source you want the touch screen to display.

As well as all of the inputs available on the main control panel, you can also select the “Media Browser” input; this is a basic media player application for running photos, videos and music files.

Picture

Here you can adjust the picture settings such as the contrast, brightness and saturation.

The pre-set picture modes include Standard, Soft, User (where you can define the values), Game, Auto, PC, Vivid, Natural or Sports.

Sound

Here you can set different sound configurations or define your own settings. You can also enable the Eco mode, which is the same as pressing the “ECO” button on the front control buttons, by selecting the “Alone” option.

The pre-set picture modes include Standard, Music, Movie, Sports or User (where you can define the values).

Setting

Under this menu are settings such as on screen display, duration time, HDMI EDID Version and power settings. You can also restore all of the menus default settings.

Under the power settings, you can define if the “MeetingPad” logo displays on start up as well as which input the screen automatically starts up in. If you want the screen to start up in the last input that was selected please choose “memory”.

2.1 INPUTS

MeetingPad - Android based system interface

OPS - Open Pluggable Specification PC

Front HDMI - Front High Definition Multimedia Interface Signal Input

HDMI 1 - Rear High Definition Multimedia Interface Signal Input

HDMI 2 - Rear High Definition Multimedia Interface Signal Input

DP - Display Port

VGA - Video Graphics Array Signal Input

CVBS - Composite Input

YPbPr - Component Input

Figure 2 Front Inputs

Figure 3 Rear Inputs (Side)

Figure 4 Rear Inputs (Bottom)

Switching between inputs

There are several ways to choose between inputs such as from the main Control Panel, the "Source" option in the Menu section and also using the remote control and front control button.

If using the remote or front controls please select the Input button to bring up the following menu:

Using the touch screen you can then swipe left and right until the input that you want is highlighted, then wait a few seconds for the screen to automatically switch input source.

3. CONNECTING YOUR TOUCH SCREEN TO A NETWORK

3.1 LAN

Wherever possible it is recommended that you connect your touch screen to your network using an Ethernet cable. Please connect your Ethernet cable to the LAN port on the touch screen’s rear input:

3.2 WI-FI NETWORK

To connect your screen to your Wi-Fi network begin by ensuring that both Wi-Fi aerials have been screwed into the sockets marked "ATN1" and "ATN2" on the side inputs:

Next, from the Home screen select "More", then "Settings":

Next, select "Wi-Fi" from the Settings menu:

Then select the Wi-Fi network that you want to connect to, this will bring up another box allowing you to enter your password:

Once you have entered your password, using the on-screen keyboard, select "CONNECT".

4. MEETINGPAD SYSTEM

You will find that the MeetingPad system has been pre-loaded onto the touch screen. Using this you can perform wireless mirroring and file sharing with external devices as well as other features such as annotating documents, web browsing and cropping existing documents. The software is ideal for conducting and recording meetings and lessons.

For more details about the MeetingPad system and how to use it please see the separate "MeetingPad User Manual" document.

5. CONNECTING TO AN EXTERNAL PC/MEDIA PLAYER

Although the screen has a built in Android operating system and accompanying software, you can also connect it to an external source. The touch screen must be connected to the PC in two ways: visually and interactively. The recommended visual connection is via a HDMI Cable (included) meaning that the display acts like a monitor for the PC. The touch function is achieved by linking the touch panel on the screen directly to the PC via the USB Cable (included).

Figure 5 Screen to PC Connections

Connect the screen to the PC via HDMI cable and USB cable using the screen’s front ports (as shown above). Once these connections have been made and the PC powered ON take the power lead and insert it into the screen and connect to mains outlet. The unit should power ON automatically, if it doesn’t please turn the power switch (next to the power input) to the ON position. If the video signal of the PC does not display then please ensure that the screen is sourcing its display from the PC. Begin by accessing the Control Panel: swipe your finger up from the bottom of the screen to the middle of the screen:

From here you can preview a different input source, such as VGA, then once selected you can touch the “Signal source” panel on the left hand side, or the preview window, to switch the touch screen to this input.

IMPORTANT: If the touch screen is the only monitor connected to your PC DO NOT take the following step. Only proceed with the following if you are using a laptop or another monitor is connected to your PC.

Access the display options from your Control Panel or right-click on your Desktop and choose "Properties" (then "Settings") or "Screen resolution". You should now click "Detect" to allow the PC to discover the Video Monitor then "Identify" to establish which display is the Video Monitor.

Select the display that corresponds with the Video Monitor display then check the box "Make this my main display" or "Use this device as the primary monitor". This will make the Video Monitor display your main monitor.

6.F.A.QS AND TROUBLESHOOTING GUIDE

6.1 MY SCREEN IS NOT DISPLAYING WHAT IS ON MY PC/EXTERNAL SOURCE

6.1.1 INPUT SOURCE

There are several ways to choose between inputs such as from the main Control Panel, the "Source" option in the Menu section and also using the remote control and front control button. If using the remote or front controls please select the Input button to bring up the following menu:

Using the touch screen you can then swipe left and right until the input that you want is highlighted, then wait a few seconds for the screen to automatically switch input source.

6.1.2 DISPLAY/MONITOR BUTTON ON PC KEYBOARD

If you are sourcing your video signal from a PC your keyboard may have a display/monitor button on it, especially if you are using a laptop. If your Video Monitor does not display the content of the PC try hitting this button before contacting your supplier.

6.2 MY MONITOR'S IMAGE IS UNSTABLE, UNFOCUSED OR SWIMMING

Firstly check that the video signal cable should be firmly connected to the monitor and the PC. Next, check the monitor and your display card with respect to compatibility and recommended signal timings.

If your text is blurred, reformat the video mode to "non-interlaced" and use 60Hz refresh rate.
