TOPAZ CONTENT MANAGEMENT SYSTEM (CMS)

- Manage your content through our **cloud based** content management system from **anywhere in the world**.

- User control enables you to **manage your users** and control who in your organisation has access to update specific areas

- Clients are issued with a username and password for our **secure web portal**, where they can **upload their content** at the click of a button which is stored on our **secure server**.

- Utilize **zoned templates** to present your videos, images, scrolling text messages, web pages and **live** RSS feeds.

- Create multiple playlists to determine exactly when the **relevant content** is displayed.

- Update your screens **individually** or in **groups**, **manually** or **automatically** depending on your requirements.

CREATE

Create custom layouts - Choose from one of the pre-designed templates or create your own layouts using zones such as video, images, text, web pages, weather and more!

This allows you to deliver targeted content and display your messages exactly how you want to!

POPULATE

Populate your layout – Upload your images and videos and simply drag and drop into your created zones to create your playlist!

Text zones can also be populated through linking to external RSS feeds or custom messaging – ensuring your messages are targeted as well as informative!

UPDATE

Update your screens from anywhere - Content can be uploaded and managed from anywhere in the world via our secure web portal. Simply log in, upload your images and videos to our secure server and send them directly to your screens.
