PRODUCT HIGHLIGHTS

TABLET LIKE AESTHETIC

With a tempered glass face, rounded corners, super slim depth, aluminum edging and a narrow bezel the Freestanding DTS displays have an eye-catching tablet-like aesthetic.

EASY TO MOVE

The integrated castors, recessed rear handles, and lightweight design make these displays extremely easy to move around displays making them the perfect portable solution. Once in place, the retractable feet can be used to keep the display in place for a more permanent solution.

10 TOUCH POINTS

With projected capacitive technology and up to 10 touch points, users can perform a variety of touch gestures. This includes manipulating images and zooming in/out, similar to using a domestic tablet or smartphone. These features also allow multiple users to interact with the screen at the same time.

BLACK VERSION AVAILABLE

Although the standard white model offers a clean, modern aesthetic, if you want a more classic look there is also a piano black version available upon request.

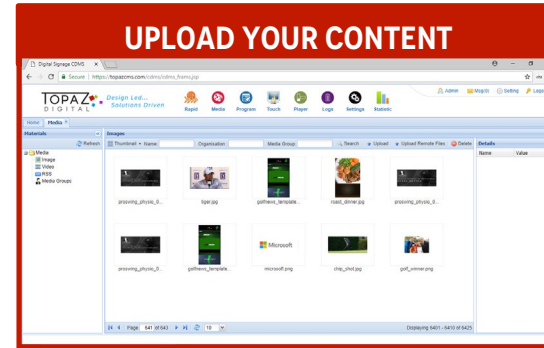

TOPAZ CONTENT MANAGEMENT SYSTEM (CMS)

Manage your content and update your TOPAZ displays through our **cloud based** content management system from **anywhere in the world**.

Content can be uploaded and managed from anywhere in the world via our secure web portal. Simply log in, upload your images and videos to our secure server and send them directly to your screens.

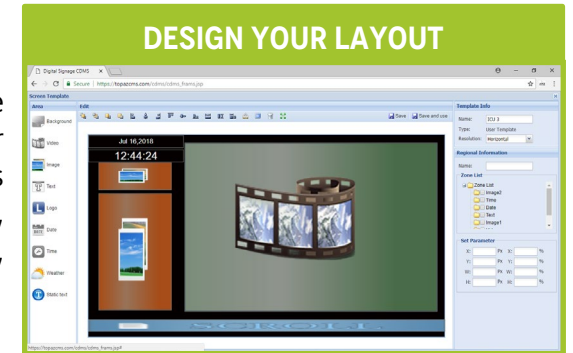

EASY TO USE INTERFACE

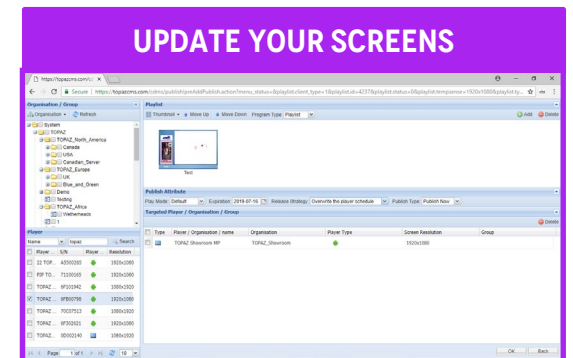

All uploaded content is stored on our secure server so is always accessible.

Choose from one of the pre-designed templates or create your own layouts using zones such as video, images, text, web pages, weather and more!

Simply drag and drop your content into your created zones to create your playlist!

You can then publish your content to single or multiple screens, or even to your entire organisation!
